

Prog.	Reference	Description
1	Warehouse 1	Batch materials and products located at the Warehouse 1 Mechanic (shelves A - B - C - D - E - F - L - M - O - P - V1 - V2 - Q - Z - etc.), As well as from recycled materials and samples / prototypes production testing, texture and details such as photos
2	Warehouse 2	Lotto materials and products located at the Warehouse 2 Electric (shelves X - Y - Z - etc.), As well as recycled materials, texture and details such as photos
3	Department 1	Lotto materials and products in the warehouse located at No. 5 modules heavy shelving (shelves N1 - N2 - I - Zone Shipping), texture and details such as photos
4	ward 2	Batch materials and products and parts largely assembled, located almost entirely in the vicinity and at the carousel molding plant with n ° 80 stations nearing completion, includes n ° 2 metal baskets with electrical materials and accessories, n ° 1 pallet with electrical cables, n ° 1 tipping plastic with various material type, n ° 2 pallets with electrical boxes, n ° 1 pallet with switchboards elements, n ° 1 pallet with switchboards equipment, n ° 1 pallet with switchboards elements, n # 1 pallet with n ° 2 metal sleepers, n ° 1 body assembled carousel, n ° 1 pallet with n ° 8 arms door complete with assembled accessories sector, n ° 8 assembled sectors, n ° 1 pallet with plates for sectors mold carrier, n ° 1 cestone metal with electrical materials and accessories, n ° 4 pallets with plates and brackets and various types of supports for molding sectors, texture and details as photos
5	ward 2	Batch materials and products and parts largely assembled, located at foaming crossbar nearing completion and at n ° 2 metal baskets, texture and details as photos

**The Quantity shown may be subject to change**

*In case of insurgency of any controversy related to the translation of present document, the Italian version has official value.*

Prog.	Reference	Description
6	Department 1	Lotto materials and products in the warehouse located on the ground at the Shipping Zone, including No. 1 basket with semi-finished No. 1 bench with towels, No. 1 pallet with carpentry, No. 2 pallets with masks, No. 1 basket with insulation, n ° 1 pallet with various material, Bonfiglioli reducer n ° 1, n ° 4 speakers with cylinders, texture and details as photos
7	ward 3	Batch materials and various structural work type and to various degrees of finish, includes structures, supports, tanks, electric motors, gear motors, sheet metal, casings, beams, pillars, portals, accessories, etc., Situated at about m ° 25 packages / pallets, in part consists of recovery elements / used, consistency and details as photos
8	ward 2	Batch materials and products and parts largely assembled, located at foaming plant under construction, including No. 3 color units nearing completion, n ° 1 to 4 tanks foaming units / components nearing completion, n ° 1 cross foaming semi-complete / assembled, texture and details as photos
9	Department 1	cabinets and paintings Lot and electrical boxes, details such as photos
10	ward 2	Batch materials and products and parts largely assembled, located at foaming plant under construction with n ° 2 tanks nearing completion and n ° 2 separate carpentry frames, texture and details as photos
11	ward 2	Batch materials and products and parts of various types, located at n ° 12 pallets on the ground, n ° 3 shelves beneath work table, n ° 1 metal cabinet, including in part from recycled materials, texture and details as photos

**The Quantity shown may be subject to change**

*In case of insurgency of any controversy related to the translation of present document, the Italian version has official value.*

Prog.	Reference	Description
12	ward 2	Cabin pentane group of 600 mc / h, cod. CABI267F98008, texture and details such as photos
13	ward 2	Batch materials and products and to a large part of assembled parts, located at No. 2 plants casting under full completion of structural parts, functional parts, electrical panels, accessories, texture and details as photos
14	ward 3	Lot n ° 11 manual presses for execution of polyurethane molding trials, with various features, dimensions and instrumental equipment, substantially constituted by elements used and / or recovery, texture and details as photos
15	ward 2	Lotto materials and electrical / electronic products (power supply, encoder, cards, accessories, etc.), Possibly in part to recover, located at cabinet M8, texture and details such as photos
16	ward 3	Lot metallic materials constituting the raw material residual, include profiles, flat, round, tubular, extruded, drawn, etc., All located at n ° 7 pallets on the ground, estimated consistency to a large maximum in about 4000 kg, more details as photos
17	ward 3	Lot rough carpentry for realization of No. 2 plant molding carousels, texture and details as photos
18	ward 3	A stamping press used by BM recovery, a vertical stroke, texture and details as photos
19	ward 3	Lotto materials and products and small parts assembly, located at No. 1 degassing facility completed, texture and details such as photos
20	ward 2	parts and bolts of various types Lot, located at metal basket, texture and details such as photos

**The Quantity shown may be subject to change**

*In case of insurgency of any controversy related to the translation of present document, the Italian version has official value.*

Prog.	Reference	Description
21	ward 3	Lot equipment used for testing plant foaming cylindrical artifacts, texture and details as photos
22	ward 3	Lot of various materials and structural work in various type and degree of finish, includes structures, supports, sheet metal, beams, pillars, doors, accessories, etc., Located at about No. 5 parcels / pallets, texture and details such as photos
23	ward 3	Lot equipment related to high-pressure foaming plant, consisting of elements used and / or recovery, n ° 2 includes reagent reservoirs, carpentry, accessories and electrical panel, texture and details as photos
24	ward 3	Lotto materials and products and small parts of various types, located at No. 5 pallets on the floor, No. 1 wooden crate and No. 1 box, includes No. 5 cylindrical shells for tanks, No. 6 tanks, no.1 head foaming, n ° 2 accumulators high blood pressure, n ° 2 partially damaged electric motors, n ° 1 electric, mold materials and accessories, oil seals and seals, accessories and various materials, etc., in part consist of recovery elements and / or semi-finished products, texture and detail as photos
25	ward 3	System foaming with n ° 2 units / components, complete with electrical panel and accessories, used and / or recovery, texture and details as photos
26	ward 2	various types of hardware and bolts Lot, located at big box, texture and details such as photos
27	ward 3	Lot Used equipment (rotary lathe) for implantation foaming cylindrical artifacts tests, consistency and details as photos
28	ward 2	Lot flexible pressure pipe, located at metallic basket, including in part from recycled materials, texture and details as photos

**The Quantity shown may be subject to change**

*In case of insurgency of any controversy related to the translation of present document, the Italian version has official value.*

Prog.	Reference	Description
29	ward 2	Lot flexible pressure pipe, located at metal case, including in part from recycled materials, texture and details as photos
30	ward 3	Lot n ° 2 manual presses for execution of tests foaming polyurethane, with various features, dimensions and instrumental equipment, substantially constituted by elements used and / or recovery, texture and details as photos
31	ward 3	System foaming with dual station / press, likely to be realized not completed and abandoned, identifier Comm. 483, texture and details as photos
32	ward 2	Lotto parts and bolts of various types, located at No. 3 pallets on the ground, texture and details such as photos
33	ward 2	Lot metal flanges of various types and sizes, situated at ground support mask, quantity estimated to be about 200 pieces, texture and details as photos
34	ward 2	Batch materials and products and parts partially assembled, located at n ° 1 carton en ° 3 pallets on the ground, includes spacers and other accessories for assembling blade-holder shaft, n ° 88 disc cutters with sharp reported, n ° 1 door tree -lame assembled complete, n ° 3 blade-holder shafts to be assembled, texture and details as photos
35	ward 3	Lotto materials and products and small parts of various types, located at No. 3 and No. 3 baskets metal pallets on the ground, including in large part from recycled materials and / or semi-finished product, texture and details such as photos

**The Quantity shown may be subject to change**

*In case of insurgency of any controversy related to the translation of present document, the Italian version has official value.*

Prog.	Reference	Description
36	ward 3	Lot constituent metallic materials raw material residual, include profiles, flat, round, tubular, extruded, drawn, threaded rods, clips, etc., All located at n ° 2 cantilever shelving en ° 1 bancaletto ground, estimated consistency to a large maximum in about 1000 kg, more details see photo
37	ward 2	Lotto electrical wiring clips, located at No. 2 modules rack and No. 2 platforms, texture and details such as photos
38	ward 2	Lotto materials and products and small parts of various types, located in a wooden box, including in part from recycled materials, texture and details such as photos
39	ward 2	Lotto flexible pressurized pipelines, located at big box, identificatio Comm. 465, texture and details such as photos
40	ward 3	Lot equipment related to wagon / foaming crossbar, consisting of elements used and / or recovery, texture and details as photos
41	ward 3	Lot equipment related to wagon / foaming crossbar, consisting of elements used and / or recovery, texture and details as photos
42	ward 3	System foaming with the station / single press, likely to be realized not completed and abandoned, texture and details as photos
43	ward 2	Lot flexible pressure pipe, located at the carton, including in part from recycled materials, texture and details as photos
44	ward 2	Lotto flexible pressurized pipelines, located at big box, identification Comm. 543, texture and details such as photos

**The Quantity shown may be subject to change**

*In case of insurgency of any controversy related to the translation of present document, the Italian version has official value.*

Prog.	Reference	Description
45	ward 2	Lotto parts and bolts of various types, located at No. 2 pallets on the ground, texture and details such as photos
46	ward 2	Lot flexible pressure pipe, located at metallic basket, including in part from recycled materials, texture and details as photos
47	ward 2	Batch materials and products and parts and of various consumables type, located at n ° 3 metal baskets, partly including materials used and / or recovery, texture and details as photos
48	ward 2	Batch materials and products and parts of various types, located at n ° 2 metal baskets, including in large part from recycled materials, texture and details as photos
49	ward 3	Lot equipment related to wagon / foaming crossbar, consisting of elements used and / or recovery, texture and details as photos
50	ward 3	Lotto materials and products and small parts of various types, located at No. 1 wooden crate, largely including bearings of great dimensions and material parts, identification Comm. 551, texture and details such as photos
51	ward 3	Implanted granulation / milling autocostruito, consistency and characteristics as photos
52	ward 3	Press foaming used by recovery, texture and details such as photos
53	Department 1	Lot of small parts and fasteners hex whatnot, details such as photos
54	ward 2	Batch materials and products and parts of various types, located at various metal shelving modules with door hardware trays, in large part including from recycled materials, texture and details as photos

**The Quantity shown may be subject to change**

*In case of insurgency of any controversy related to the translation of present document, the Italian version has official value.*

Prog.	Reference	Description
55	ward 2	Batch materials and products and parts of various types, located at metallic basket, including in part from recycled materials, texture and details as photos
56	ward 2	Lot pipelines and conduits, located at metallic basket, including in part from recycled materials, texture and details as photos
57	ward 2	Lot n ° 5 lubricating oil drums Agip Blasias 220, consistency about 100 lt.
58	ward 2	Lot No. 4 plates and No. 4 discs, located at floor-level platform, texture and details such as photos
59	ward 2	Lotto including No. 3 traverses and various channels-metallic conduit, located at large floor-level platform, texture and details such as photos
60	ward 3	Batch materials and products and parts of the electric type, located at n ° 2 pallets on the ground, includes metal raceways for conduits and accessories for electrical installations discontinued, in part consist of recovery elements, texture and details as photos
61	ward 2	Extruder recovery on a pallet on the floor, texture and details such as photos
62	ward 2	Batch materials and products and parts of various types, located at metallic basket, in part including stems and lubricants from recycled materials, texture and details as photos
63	ward 2	Lot No. 3 pump groups + n ° 1 electric motor, located at floor-level platform, material used or recovery, texture and details as photos
64	ward 2	Element for semi centrifuge to be scrapped, estimated weight about 1000 kg, texture and details as photos

**The Quantity shown may be subject to change**

*In case of insurgency of any controversy related to the translation of present document, the Italian version has official value.*

Prog.	Reference	Description
65	ward 2	Lotto materials and products and small parts of various types, located at the workbench, largely including from recycled materials, texture and details such as photos
66	ward 2	Lot n ° 2 three-phase transformers, texture and details as photos
67	ward 2	Batch materials and products and parts and materials of various kinds of consumption, located at n ° 2 trolleys, in large part including from recycled materials, texture and details as photos
68	ward 3	Lot No. 1 recovery electrical panel, texture and details such as photos
69	ward 3	Lot elements for heating / drying the catalytic type, located at No. 1 pallet on the ground, includes recovery apparatuses, texture and details as photos
70	ward 3	Batch materials and various products for polyurethane molds, located at No. 1 metal basket, in large part including the material used and / or recovery, texture and details as photos
71	ward 3	Lot drums with lubricants, chemicals, diathermic oil, etc., consists of approximately n ° 25 containers in various sizes and various degrees of filling, probably includes elements to be subjected to disposal, texture and details as photos
72	ward 3	Lot likely quartz powder for molding fillers, located at No. 1 big bag Polat Maden, estimated consistency to a large maximum in about 2000 kg, consistency and characteristics as photos
73	ward 3	Power units / auger transport, with the drive motor, texture and details as photos

**The Quantity shown may be subject to change**

*In case of insurgency of any controversy related to the translation of present document, the Italian version has official value.*

Prog.	Reference	Description
74	ward 3	Lotto elements for cabinets and panels and electrical systems, located at No. 1 pallet on the floor, includes in part from recycled materials, texture and details such as photos
75	ward 2	Small batch and extruded metal racks, located at floor-level platform, including in part from recycled materials, texture and details such as photos
76	ward 2	Lot flexible pressure pipe, located at metallic basket, including in part from recycled materials, texture and details as photos
77	ward 2	Batch materials and products and parts of various types, located at metallic basket, in part including n ° 4 electric motors and from recycled materials, texture and details as photos
78	ward 2	Batch materials and products and parts of various types, located at metallic basket, partly including circuit video surveillance cameras, various motion reducers and recycled materials, texture and details such as photos
79	ward 2	Batch materials and products and parts of various types, located at box, partly including toothed belts and raceways and staffame and recovery materials, texture and details as photos
80	ward 2	Lotto materials and products and small parts of various types, located in a wooden box, including in part from recycled materials, texture and details such as photos
81	ward 2	Lot for piping insulation materials (outside containment), located at No. 1 pallet on the ground, texture and details such as photos
82	ward 2	Batch materials and products and parts of various types, located at metallic basket, including in part from recycled materials, texture and details as photos

**The Quantity shown may be subject to change**

*In case of insurgency of any controversy related to the translation of present document, the Italian version has official value.*

Prog.	Reference	Description
83	ward 2	Lotto flexible pipes under pressure and accessories, located at big box, including in part from recycled materials, texture and details such as photos
84	ward 2	Lot for piping insulation materials (outside containment), located at No. 1 pallet on the ground, texture and details such as photos
85	ward 2	Lot No. 8 rollers various types, located at floor-level platform, texture and details such as photos
86	ward 2	Lot pipes and ducts and clips, located at No. 1 cestone metal, including in part from recycled materials, texture and details as to photo
87	ward 3	Lot No. 2 control cabinets recovery / disposal, texture and details such as photos
88	ward 3	Lot around No. 8 elements / barrier confinement / segregation systems, texture and details such as photos
89	ward 3	Lot No. 2 control cabinets recovery / disposal, largely cannibalized, texture and details such as photos
90	ward 3	Batch materials and products and parts of various types, located at n ° 1 large box, in part including materials and electrical accessories and recovery elements, texture and details as photos
91	ward 3	Lotto materials and products and small parts of various types, located at No. 1 large box, in large part including materials and motors and geared motors and recovery control, texture and details such as photos
92	ward 3	Batch materials and products and parts of various types, located at No. 1 wooden box, in large part including materials and motors and gearmotors recovery, texture and details as photos

**The Quantity shown may be subject to change**

*In case of insurgency of any controversy related to the translation of present document, the Italian version has official value.*

Prog.	Reference	Description
93	ward 3	Lotto materials and various types of obsolete products, located at No. 6 large boxes, largely including from recycled materials, texture and details such as photos
94	ward 3	Hydraulic unit dismantled recovery, including accessories, texture and details such as photos
95	ward 3	Batch materials and products and parts, Accessories, and of various types, located at various metal boxes door-pieces and plastic boxes of the workshop area, including in part from recycled materials, texture and details as photos
96	ward 2	Batch materials and products and parts of various types, situated at wooden crate, in part including molds and elements from recycled materials, texture and details as photos
97	ward 2	Lotto materials and products and small parts of various types, located at floor-level platform, in part including blades and recycled materials, texture and details such as photos
98	ward 2	mechanical reducer Rossi recovery, texture and details such as photos
99	ward 3	Lotto materials and various types of obsolete products, located at No. 1 large box, in large part including from recycled materials, texture and details such as photos
100	ward 2	Lotto materials and products and small parts of various types, located at floor-level platform, largely including from recycled materials, texture and details such as photos
101	ward 2	Small batch flexible pipes under pressure, located on the ground, texture and details such as photos

**The Quantity shown may be subject to change**

*In case of insurgency of any controversy related to the translation of present document, the Italian version has official value.*

Prog.	Reference	Description
102	ward 2	Lotto pipes and ducts and electrical wiring clips and accessories, located at No. 2 pallets on the ground, including in large part from recycled materials, texture and details like a photo
103	ward 2	Lot seals of various types and sizes of wall panel, texture and details as photos
104	ward 2	Lotto materials and products and small parts of various types, located at the workbench, largely including from recycled materials, texture and details such as photos
105	ward 2	Small batch materials for electrical systems, located at the worktable, texture and details such as photos
106	ward 2	Lotto clips and electrical cables, situated at floor-level platform, largely including materials used and / or recovery, texture and details such as photos
107	ward 2	Batch materials and products and parts of various types, located at n ° 3 workbenches, largely including from recycled materials, texture and details as photos
108	ward 3	Lot No. 1 recovery electrical panel, texture and details such as photos
109	ward 2	Batch materials and products and parts of various types, located at No. 1 pallet on the ground, in large part including elements for confinement / segregation systems and recovery materials, texture and details as photos
110	ward 2	Small batch materials and products and small parts of different type located by plastic tape, in large part including from recycled materials, texture and details such as photos
111	ward 2	Small batch elements and metal parts, located at metal case, including in part from recycled materials, texture and details as photos

**The Quantity shown may be subject to change**

*In case of insurgency of any controversy related to the translation of present document, the Italian version has official value.*

<b>Prog.</b>	<b>Reference</b>	<b>Description</b>
112	ward 2	Small batch elements and special metal racking, located at floor-level platform, including in part from recycled materials, texture and details such as photos
113	ward 2	Lotto materials and products and small parts of various types, located at wooden crate, largely including from recycled materials, texture and details such as photos
114	ward 2	recovery unit, located at floor-level platform, texture and details such as photos
115	ward 2	Small batch materials and products and small parts of various types, located at the carton, largely including from recycled materials, texture and details such as photos
116	ward 2	Lot elements and metal parts, located at n ° 2 large boxes, including in part from recycled materials, texture and details as photos
117	ward 2	Lotto laminate plates and other accessory elements, located at No. 1 pallet on the ground, texture and details such as photos
118	ward 2	Lotto plasterboard sections and elements and insulating elements confining walls, located at No. 2 large pallets on the ground, texture and details such as photos
119	ward 2	Small batch elements and mechanical parts, located at wooden box, in large part including from recycled materials, texture and details as photos
120	ward 2	Batch materials and products and parts of various types, located at No. 1 cestone metallic, largely including from recycled materials, texture and details as photos
121	ward 3	Lotto jars and cans with paint and solvents and catalysts, located at big box, it probably includes elements to be subjected to disposal, texture and details such as photos

**The Quantity shown may be subject to change**

*In case of insurgency of any controversy related to the translation of present document, the Italian version has official value.*

<b>Prog.</b>	<b>Reference</b>	<b>Description</b>
122	ward 3	Small batch elements and metal components, located at No. 1 pallet on the ground, including in large part from recycled materials, texture and details such as photos
123	ward 2	Small batch elements and mechanical parts, located at the small box, in large part including from recycled materials, texture and details as photos

**The Quantity shown may be subject to change**
