

RELAZIONE DI STIMA
DI UNA SERIE DI BENI APPARTENENTI ALL'EREDITÀ GIACENTE
“PATRON ELIGIO”

Il sottoscritto, Dott. Ing. Massimo Selvatico, iscritto all'Ordine degli Ingegneri della Provincia di Vicenza al n. 2328, con studio in Via Monte Zebio n. 4 a Dueville (VICENZA), in Corso Stati Uniti n. 14/d a PADOVA, in Via del Fante n. 15/A a VERONA ed in Via Julia n. 71/2 a Cà Savio (VENEZIA), ha ricevuto dalla Dott.ssa Annalisa Monaco l'incarico professionale di stilare una perizia estimativa di un complesso di beni appartenenti all'attività aziendale dell'eredità giacente di PATRON ELIGIO.

Esaminati i beni attraverso appositi sopralluoghi, lo scrivente ha redatto la presente relazione tecnica di stima.

§§§§§§ §§ §§§§§§

L'anno 2021, il giorno 19 marzo alle ore 15.30, il sottoscritto Dott. Ing. Massimo Selvatico, perito incaricato di valutare le attrezzature, gli automezzi, gli arredi e l'elettronica d'ufficio, nonché il magazzino dell'eredità giacente di PATRON ELIGIO, si è recato presso la sede aziendale, a Thiene (VI), in Via Valdastico snc angolo Via Campana, per effettuare le operazioni di verifica e di stima dei beni mobili appartenenti all'eredità giacente di PATRON ELIGIO.

Sono presenti sul posto il Cancelliere Michela Bonato ed il Curatore Dott.ssa Annalisa Monaco che hanno seguito le operazioni di individuazione e valutazione dei beni.

Successivamente le operazioni sono proseguite in data 29 marzo 2021, in data 03 aprile 2021, in data 10 aprile 2021, in data 23 aprile 2021 ed in data 24 aprile 2021 sempre presso la sede aziendale, a Thiene (VI), in Via Valdastico snc angolo Via Campana.

Il risultato della valutazione viene descritto nella perizia di seguito riportata.

PERIZIA DI VALUTAZIONE DEI BENI MOBILI SOTTO ELENCATI

Con la presente relazione si espongono i valori relativi ai beni mobili (attrezzature, automezzi, arredi ed elettronica d'ufficio, nonché il magazzino) dell'eredità giacente di PATRON ELIGIO.

I valori attribuiti ai beni facenti parte del patrimonio inventariato dell'eredità giacente di PATRON ELIGIO, sono stati determinati secondo un criterio prudenziale, tenuto conto dell'attuale stato d'uso dei beni, del loro costo di acquisizione e del prezzo attualmente praticato sul mercato dell'usato di beni analoghi a quelli oggetto di stima.

N.B. E' opportuno precisare che tutti i valori espressi in perizia sono al netto di IVA (ove dovuta per legge). Nel caso dei mezzi di trasporto, qualora gli stessi siano in "regime del margine" e non in "regime di IVA", al valore indicato dovrà essere sommato comunque il 22%.

Sarà compito dell'acquirente/utilizzatore aggiornare la propria valutazione dei rischi ai sensi dell'art. 17 del D.Lgs. 81/08, individuando i rischi introdotti dalla macchina/impianto/attrezzatura acquistata, nonché le relative misure di prevenzione e protezione.

L'acquirente/utilizzatore dovrà inoltre elaborare apposite procedure di lavoro [D.Lgs. 81/08]; dovrà informare, formare nonché addestrare i lavoratori sulle procedure elaborate, sulle procedure di ordinaria manutenzione, sull'obbligo di attenersi alle stesse, nonché sul divieto per i lavoratori di effettuare di propria iniziativa operazioni non previste.

La valutazione è avvenuta con macchine ferme: sarà quindi compito dell'acquirente/utilizzatore provvedere alla verifica di tutti i dispositivi di sicurezza presenti (es. microinterruttori, fotocellule, singoli o doppi comandi ad azione mantenuta, barre e/o funi di sicurezza, etc.), al fine di accertarsi del funzionamento degli stessi, nonché della presenza di tutte le carterature che possono essere smontate (ad

esempio per la movimentazione/manutenzione). Ad ogni modo si evidenzia quanto segue.

Per quanto riguarda tutte le scaffalature metalliche, le stesse dovranno essere vincolate saldamente a terra oppure a parete. Dovranno essere provviste di cartellonistica indicante la portata per ripiano, nonché il divieto di arrampicarsi sulle scaffalature. Nel caso in cui vengano collocate in una zona di passaggio di carrelli elevatori o mezzi in generale, dovranno essere provviste di appositi paracolpi che consentano di proteggere i montanti delle stesse.

Il carrello elevatore dovrà essere sempre provvisto di sistema di protezione fissa sul montante o sulla cabina (es. griglia, plexiglass, etc.), che impedisca l'eventuale contatto di parti dell'operatore (es. mani/braccia) con parti pericolose in movimento accessibili (es. pistoni, catene, castello, etc.). Dovrà essere presente un sistema (es. cinture di sicurezza) che trattenga a bordo del mezzo l'operatore, in caso di ribaltamento del mezzo stesso, in modo da impedire che l'operatore rimanga schiacciato tra il mezzo e la pavimentazione.

Il carrello elevatore dovrà essere provvisto di lampeggiante, di cicalino ed avvisatore acustico sempre funzionanti: il lampeggiante dovrà entrare in funzione ogniqualvolta l'operatore sarà seduto sul carrello elevatore, il cicalino ogniqualvolta verrà inserita la retromarcia mentre il clacson su azionamento dell'operatore. L'azionamento delle leve non dovrà avvenire accidentalmente: a tal proposito dovranno essere provviste di una protezione che impedisca il loro azionamento involontario o sistema equivalente. La portata delle forche in funzione dell'altezza da terra delle stesse, ovvero della collocazione del carico sulle stesse, dovrà essere indicata su apposita targhetta. Infine un microinterruttore posto sotto il sedile dovrà impedire l'azionamento del carrello elevatore da terra.

Sarà compito dell'acquirente/utilizzatore garantire il rispetto delle norme relative alla prevenzione incendi, delle norme relative alla tutela ambientale, oltre che il rispetto delle norme relative alla salute e sicurezza sul lavoro.

Di seguito si riporta il valore attuale attribuito ai beni mobili, coincidenti nella tipologia, nel modello e nell'anno di produzione, ai beni oggetto della presente perizia (nello stato in cui gli stessi si trovano), tenuto conto della situazione economica attuale del settore, nonché della loro appetibilità commerciale.

Il numero individuato nella colonna "Prog." corrisponde al codice identificativo del bene, attribuitogli in sede di inventario.

MAGAZZINO

Per quanto riguarda l'inventariazione del magazzino, la stessa è stata condotta sulla base degli elenchi messi a disposizione dal personale di PATRON ELIGIO, realizzati a seguito di una inventariazione fisica di tutti gli articoli che costituiscono il magazzino condotta dallo stesso personale ancora in forza. Successivamente sono state effettuate delle verifiche a campione condotte dal sottoscritto con l'ausilio di propri collaboratori e dal Cancelliere Michela Bonato. Il campione di verifica è stato scelto in modo che fosse significativo, sia in termini di rappresentazione numerica dei prodotti caricati a magazzino, sia in termini di rappresentazione economica. La valutazione è riferita al 28 febbraio 2021.

Per l'effettuazione della valutazione si è tenuto conto dell'appetibilità commerciale dei materiali/prodotti, ovvero dell'effettiva possibilità del loro impiego/vendita.

In allegato si riportano le specifiche della valutazione condotta mentre nella tabella che segue si riportano i valori complessivi.
